

***Learn the secrets to  
delivering successful  
projects***

## What it takes to deliver successful projects

### Workshop Overview

This high level workshop is intended to provide participants with a clear view of what it takes to be able to deliver successful projects in today's challenging environment.

What are the important foundations that need to be put in place to give you and your organisation the best chance of delivering successful project outcomes?

Sometimes there can be a level of dis-connect between the executive leadership team and the operational delivery teams.

This workshop is all about trying to ensure everyone is on the same page, clarifying the important keys to success and the critical roles & responsibilities of each party.

### Workshop Content

- The importance of PM skills
- Projects vs. Operations
- Project success & failure
- Project Life Cycle & Critical Knowledge Areas
- Project Stakeholders
- Project vs. Program vs. Portfolio
- The role of the PM and the Sponsor
- Project Methodologies

### Learning Outcomes

- To provide an understanding of the core principles of project management
- An appreciation of why project management skills are so important in today's world
- An understanding of the 'project life cycle' and how you should manage a project if you want to follow best practice principles
- To teach people the secrets to delivering successful project outcomes

### Duration

This in-house workshop can be either ½ day or 1 day.

### Who Should Attend?

This workshop is targeted at anyone who wants to know the important foundations of delivering successful projects. Participants could include executive, senior level management, organisational managers or any other party who does not have a background in project management.
