

Management
Training

Adaptability is seen as the single most important skill to thrive in the 21st century. To enable this we MUST embrace the mindsets and principles of Agile & Lean thinking. In 2 days learn the critical aspects of becoming an Agile & Lean project leader.

Agile & Lean Essentials for Project Leaders

A new 'best of breed' short course from ETM

Course Overview

We live in a **VUCA** world where the pace of disruption is accelerating. To ensure survival ALL organisations need to become more **ADAPTABLE**.

To enable this 'Business Agility' organisations are embracing Agile & Lean practices which is having a massive impact on the way projects get delivered.

We aim to provide participants with a "world class" short course in Agile & Lean. As always at ETM our focus is on keeping things simple, practical, flexible and fun.

This course is targeted at people who want to quickly and efficiently learn the important principles of Agile & Lean and how they to apply to delivering successful projects & achieving the best business outcomes. What do I "really" need to know and how will I do it? What do the experts know & do?

The course is extremely practical in focus and all materials are based on the latest best practice theory. Classes are facilitated by highly experienced project leaders who encourage open discussions to enable all participants to see how to apply the theory to their own individual workplace.

Our primary goal is to ensure participants walk away from this short course with a full understanding of all the important principles of Agile & Lean and can confidently apply in practice.

Learning Outcomes

Our expectation will be that ALL participants walk away from our short course with the following:

- A sound understanding of 'Business Agility' and its importance in today's environment.
- To understand all of the core principles & mindset of being 'Agile' & 'Lean'
- To fully appreciate the critical differences between 'Waterfall' & 'Agile' approaches.
- To get some hands on life cycle experience of operating in a best practice agile scrum environment (e.g. Initiating, sprint planning, stand-ups, showcases and retrospectives).
- To experience, build & understand the value of Kanban boards, burn-down and burn-up charts.
- To get an overview of some of the most widely used Agile Lifecycle tools (i.e. Atlassian (JIRA), RALLY/CA and Agile Craft)
- To get an understanding of how we can go about transforming our organisations and what will be the biggest challenges.
- How to balance integrating 'Agile' and 'Waterfall' in a bi-modal organisation.
- Participants to be able to confidently apply these new skills

Duration?

Two consecutive days.

Who Should Attend?

This course is suited to anyone who wants to know the important mindset & principles of Agility and how to apply them to get the best business outcomes. Participants could include executives, portfolio manager's program managers, project managers, project leaders, organisational managers and business analysts.

Cost?

\$1,320 (including GST) per person.

“In the new world it is not the big fish which eats the small fish; it’s the fast fish which eats the slow fish”

Klaus Schwab

About Us

ETM Management Training is a privately owned niche organisation passionate about developing and supporting “world class” project leaders.

Expert Facilitators. Our facilitators are of the highest calibre and proven experts in their field. They are highly qualified and have experience across many different industry sectors.

Simple & Practical. At ETM we work very hard to simplify the complex down to what you need to know and how you apply it in the real world. Our number one primary goal is always to ensure participants walk away from any of our programs with a full understanding of the important principles, have some practical tools & techniques which they can confidently apply in their own work environment.

Proven Track Record of Success. Since our formation in 2011, we have a proven track record of developing and supporting project leaders, and helping our clients to deliver successful project outcomes. This has resulted in consistent repeat business from our existing client base.
